SUPPLEMENTARY INFORMATION:

I. Abstract

United States (U.S.) participation in the Inter-American Tropical Tuna Commission (IATTC) results in certain recordkeeping requirements for U.S. fishermen who fish in the IATTC's area of management responsibility. These fishermen must maintain a log of all operations conducted from the fishing vessel, including the date, noon position, and the tonnage of fish aboard the vessel, by species. The logbook form provided by the IATTC is universally used by U.S. fishermen to meet this recordkeeping requirement. The information in the logbooks includes areas and times of operation and catch and effort by area. Logbook data are used in stock assessments and other research concerning the fishery. If the data were not collected or if erroneous data were provided, the IATTC assessments would likely be incorrect and there would be an increased risk of overfishing or inadequate management of the fishery.

II. Method of Collection

Vessel operators maintain bridge logs on a daily basis, and the forms are either mailed to the IATTC or to National Marine Fisheries Service (NMFS) at the completion of each trip. The data are processed and maintained as confidential by the IATTC.
